Free Chess by Pardolabs is a turn-based strategy game where you can compete against the game's artificially intelligent system. While your opponent is controlled by AI, you get to dictate the game's difficulty level. The objective of the game is to perform a checkmate on your opponent using the standard rules of chess. This means each player will get sixteen chess pieces consisting of a king, rook, queen, pawn, knight, bishop. Once you place your opponent's king in a check, you are declared the winner. GameplayFree Chess is a single-player, strategy game that follows the laws of chess. This includes the initial setup of chess wherein a square board is divided into an eight-by-eight board. This makes 64 squares of alternating light and dark colors. You will see that the right-most corner will always be white. On top of the board are the 32 chess pieces. This gives each player 16 pieces each, namely: 1 King 1 Queen 2 Rooks 2 Bishops 2 Knights 8 Pawns. You will be controlling the white pieces, allowing you to make the first move. As the game progresses, you must move your pieces even if the move is detrimental. This is because the rules of chess states that players are not allowed to skip a turn. Each kind of chess piece has its own method of movement. Generally, a piece moves to a vacant square - black or white - except when the goal is to capture an opponent's piece. Capturing or taking a piece is when you replace a piece on its square. Pawns are the first pieces you will move. They can move to a square directly in front of it if it is vacant. It can also move diagonally but only when you're capturing the opponent's piece. The bishop and the queen can move any number of vacant squares horizontally, vertically, or diagonally. Your king can also move the same way but only one square per turn. Rooks can also move any number of squares but only horizontally and vertically. The knight differs from all the pieces as it can jump towards the nearest square. System Requirements Pardolabs designed this game with three-dimensional graphics. This allows you to see the chess the same way you would in real life. The game is also fitted with a free and open-source chess engine called Stockfish. It uses up to 512 threads in a central processing unit. This allows it to implement an advanced alpha-beta search and use bitboards in your multiprocessor system. To play Free Chess by Pardolabs, you will need a computer running a Windows operating system. This is limited to the 32-bit and 64-bit versions of Windows XP, Windows Vista, Windows 7, Windows 8, and Windows 10. Chess game for all user-levels Free Chess by Pardolabs is a suitable game for traditional chess fans. The game follows the laws of chess to a tee. With that, you will need to familiarize yourself with the movements and functions of the different pieces. Free chess serves as a digital platform for chess enthusiasts and expert players. The game is not as dynamic as playing with a real person, but its AI can challenge you through various difficulty levels. Chess, as a board game, is one of the most challenging and complex activities you can do in your free time or if you feel like having a duel with one of your colleagues or college mates. Fortunately, there are a lot of options on your Windows 11/10 PC to play Chess with bots or compete with actual humans, whether friends or online players. You can choose to download a desktop software or a Windows Store app or play online, depending on your preference.Chess Games for Windows 11/10Here is a list of some of the best free Chess games for your Windows 11/10 PC. Pick a 3D Chess Game, a desktop freeware, a Windows Store app or play an online chess game.1. 3D Chess Game3D Chess Game for Windows 10 is a chess game that takes not a lot of disk space. The 3D graphics have been carefully designed, giving the players a lot of zooms and swivel freedom. The game offers around 25 levels that you can play against bots, increasing difficulty with each level. Do keep in mind that there is no online playing mode as the game is downloadable and can be played without internet access. The game offers performance statistics after every round but the audio is quite unrealistic, and the game is better played on mute. Get it from the Windows Store. You can also check out another 3D Chess game there.2. ChessThis interactive chess application is a great game to explore when you have no work in an office or are just trying to pass some time. Pick your difficulty level and see if you can beat the AI as it increases difficulty. You also have the option to undo your move if you make a mistake. Chess records the moves in the standard chess notation and lets you jump to any point in the game. The moves are automatically saved and loaded when you close and reopen the application. The development of the game is assessed in the Evaluation panel - positive values indicate White's advantage, negative values indicate Black's advantage. Download it from CNET - the download looks clean by the way!3. Chess 24If you want to explore the world of playing chess with multiple players online, whether on your network or across the world, Chess24 offers a great platform for you to do just that. Chess24 is an Internet-only chess gaming website that offers languages including Spanish, English, and German. The biggest aspect of Chess 24 is that it is fully supported and endorsed by big chess grandmasters like Vishwanathan Anand and Peter Svidler. Gaming is not the only aspect of this website. You can also stream and watch major chess events live from anywhere in the world. Chess 24 also lets you improve your game by offering different trainers and practice modes. Click here to visit the website.4. Chess TimeChess Time is one of the highest-rated chess game apps on Windows Store. It is available on both Windows 10 and Windows Phone. The best feature of this app is that you can play online with cross-platform users on even Android and iOS at the same time. You can invite friends in for a game or someone random. Your ranking and amount of points are determined by your win-loss ratio. If you enjoy Chess, this is a great way to play the game if you're ever bored.5. Lucas ChessAnother free online portal for playing chess is Lucas Chess. The game has 40 engines prepared to play from the start, and with very different levels, from 0 to 3300. This is purely played with the computer and you choose to either train, play with one engine or play with a combination of engines to challenge the best in you. There is also a special mode for young children getting into the game, wherein they will be able to begin their apprenticeship with special engines that know little more than moving the pieces, and this will enable them to win against the engines from the very beginning.Any Chess lovers here?
